## Professional Profile

Full Stack Developer with over 3 years of professional experience delivering high-performance, scalable, and secure web applications. Skilled in both frontend and backend development, cloud deployment, and API integrations. Passionate about cybersecurity, automation, and clean code practices. Adept at managing projects independently and in team environments.

## Technical Skills

- Programming: JavaScript, Typescript, React, Node.js, Fastify, Prisma
- Databases: MySQL, PostgreSQL, MongoDB
- Cloud & DevOps: AWS, Docker, Git, Linux CLI
- Cybersecurity: Metasploit, Hydra, SQLmap, Gobuster, Proxycchains, Tor
- Other: Web scraping, API integration, performance optimization

## Professional Experience

### Full Stack Developer – Freelance / Private Projects

*Sep 2022 – Present*

- Developed and maintained multiple platforms, including buscomas.com, qualesito.com, and custom CRM systems.
- Built automated phone number scrapers and cultural event platforms with map integration.
- Integrated payment systems, authentication, and advanced search features.

### IT Specialist & Developer – Marketing Company

*Sep 2022 – Present*

- Maintained and optimized infrastructure for classified ads in the personal services sector.
- Automated workflows, reducing manual posting time by 60%.
- Implemented cybersecurity best practices and technical support.

## Education

- High School Diploma (Bachillerato) – Spain
- Self-taught in Full Stack Development & Cybersecurity

## Project Highlights

- Cultural Events Finder – Interactive web app with personalized recommendations.
- Real Estate Platform (in development) – Similar to Idealista, for an independent realtor.

## Languages

- Spanish – Native
- English – Upper-Intermediate (B1)

## Salary Expectation

€3,000 – €3,500 gross/month (B2B)
